Product Sheet
RetailApp

BIZERBA

RetailApps – small units of functionality with major impact.
These useful applications supplement the RetailPowerScale scale solution
and combine individuality with the advantages of standard software.
Modular design, readily available, at an attractive price.

CustomerSearch

Searching more conveniently means finding faster what you're looking for: Expand your search options in the customer master data of your scale with the RetailApp CustomerSearch.
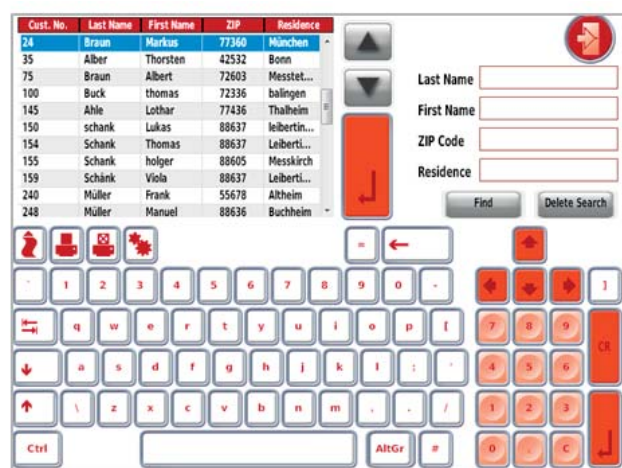

The RetailApp CustomerSearch is used to search customer data by first and last name, zip code and city. The correct customer is quickly found via full text or partial text search. And when entering several search criteria the hit list automatically updates itself. This RetailApp can be called-up via manual start using a separate key, only if needed. Easily finding customers even if customer number is unknown – No problem, CustomerSearch can help.

Functionalities

– Searching customer data based by:
– First and last name
