**Excellent labeling with the GLM-I: An innovative solution allows working efficiently in small spaces - with optimized set-up time, best availability and quality check inside. Discover tangible added value for your price and goods labeling.**

**More information**  
High performance  
with a wide range of  
solutions and options.

### Product description

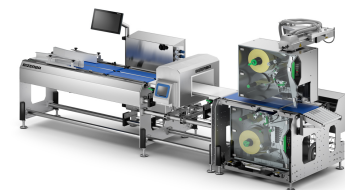

Take automatic weighing and labeling of prepacked goods to a new level in the industrial food sector: A modular design and particularly space-saving labelers significantly reduce the system length in systems with multiple labelers. Regardless of the conveying direction, always direct access from the front for maintenance and label roll change. The robust printing mechanism requires less maintenance and reduces downtimes. Throughput can also be increased due to a higher print speed. Very easy label roll change and the new, intuitive user interface make daily work on the GLM-I more convenient. Highly flexible, durable, robust and a design which is easy to clean round off this package loaded with benefits. Tip: By additionally integrating the intelligent inspection system LabelSecure T Basic for visual quality control you can detect errors in the packaging process in good time.

GLM-I 150

### Highlights

- Processes up to 170 packages/minute
- Weighing and packaging of prepacked products with a minimum of space
- Regardless of the conveying direction - quick label roll and printhead change thanks to direct front access
- Control of up to 6 labelers
- No thermal transfer ribbon needed due to Eco Motion technology
- Modern and intuitive user interface
- Processing of both paper and transparent film labels
- Fully automatic label verification through Plug-In®-Label function
- Printing and processing of any one and two-dimensional standard barcodes, among other things GS1 data matrix and GS1 QR code
- Remote service

GLM-I 100 with metal detector

### Options

- Integration of LabelSecure T basic for visual inspection of packages and labels
- Ultrasonic sensor for detection of transparent labels
- EcoMotion printer
- Thermal transfer device
- Applicators: Air-jet, piston, rotary, belt and C-Wrap applicator
- Additional rejection systems

Label printers

### My Bizerba

We offer you solutions from a single source which can be customized and allow you to respond to any change in a flexible manner. Benefit from costs which can be planned and efficient processes. We are happy to advise you.
